

Nutrition API

1. Creating an account using username, email id, password

The screenshot shows the RapidAPI sign-up page in a web browser. The browser's address bar displays 'rapidapi.com/auth/sign-up'. The page features a sign-up form on the left and a promotional banner on the right. The form includes options to 'Sign up with Github' and 'Sign up with Facebook', followed by a separator 'or'. Below this, there are input fields for 'Username' (containing 'vinothini'), 'Email' (containing 'vv0207490@gmail.com'), and 'Password' (masked with dots and marked as 'Strong' with a green checkmark). The right banner has the heading 'Find and Connect to Thousands of APIs' and a list of features: 'Discover APIs', 'Test from your browser', 'Connect using code snippets', and 'Manage APIs from one dashboard'.

4.This is the main page after you login

5.The Nutrition API Page

The screenshot displays the RapidAPI interface for the 'Recipe - Food - Nutrition' API. The page is titled 'Recipe - Food - Nutrition' and is marked as 'FREEMIUM' and 'Verified'. The main content area is divided into three sections: a left sidebar with a search bar and a list of endpoints, a central panel for the selected endpoint, and a right panel for code snippets.

Left Sidebar: A search bar labeled 'Search endpoints' is at the top. Below it, a list of endpoints is shown under the 'Recipes' category:

- GET Search Recipes
- GET Search Recipes (Deprecated)
- GET Search Recipes Complex (Deprecated)
- GET Search Recipes by Nutrients
- GET Search Recipes by Ingredients
- GET Get Recipe Information
- GET Get Recipe Information Bulk
- GET Get Similar Recipes
- GET Get Random Recipes
- GET Autocomplete Recipe Search

Central Panel: The selected endpoint is 'GET Search Recipes'. It includes a description: 'Search through thousands of recipes using advanced filtering and ranking. NOTE: Since this method combines searching by query, by ingredients, and by nutrients into one endpoint, each request counts as 3 requests.' Below the description is a form for authentication and request configuration:

- Personal Account:** A dropdown menu showing 'Vinothini2002'.
- RapidAPI App:** A dropdown menu showing 'default-application_6867660' with a 'REQUIRED' label.
- Request URL:** A dropdown menu showing 'rapidapi.com' with a 'REQUIRED' label.

Right Panel: The 'Code Snippets' section shows a code snippet for using the API with Axios. The snippet is as follows:

```
(Node.js) Axios Copy Code
const axios = require('axios');

const options = {
  method: 'GET',
  url: 'https://spoonacular-recipe-food-nutrition-v1.p.rapidapi.com/recipes/complexSearch',
  params: {
    query: 'pasta',
    cuisine: 'italian',
    excludeCuisine: 'greek',
    diet: 'vegetarian',
    intolerances: 'gluten',
    equipment: 'pan',
    includeIngredients: 'tomato,cheese',
    excludeIngredients: 'eggs',
    type: 'main course',
    instructionsRequired: 'true',
    fillIngredients: 'false',
    addRecipeInformation: 'false',
  }
}
```
